Thank you for downloading Xenon. This is just a small guide to keep you fresh!

Get to know all the commands in "commands.java" in the Xenon Source folder.
    Path: XENON\Xenon Source\src\server\model\players\packets\commands.java

To make yourself owner
1. Log in with an account name of your choice
2. When everything loads, log back out
3. Go to Xenon Source folder
4. Head to the Data subfolder
5. Head to the 1.)TrisidiaX Player subsubfolder
6. Open the folder that has your account name on it
7. Look for "character-rights=0"
8. Change 0 to 3

To run client
1. Go to Xenon Client
2. Right click on initiate.bat (not 1. Run.bat)
3. Edit the Java Development Kit (JDK) to the JDK you have

To find the JDK you have
1. Go to your C:\ drive
2. Go to Program Files
3. Head to Java
4. Look for jdk1.#.#_##

    In case you can't find JDK in Program Files
    1. Go to your C:\ drive
    2. Go to Program Files (x86)
    3. Head to Java
    4. Look for jdk1.#.#_##

To edit shops
1. Go to Xenon Source folder
2. Go to the Data subfolder
3. Head to CFG subsubfolder
4. Open Shops.cfg
5. Edit shop name, items, amount and shop ID

For more details, head to the Server Tutorial board on Moparscape or YouTube some tutorials
OR get some private help from me on Skype for a small fee of $3/hour ($1.5/30 mins)
